***Allowable Subject Matter***

1. Applicant's arguments to the drawings and specification are deemed to overcome the outstanding office action.
2. Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance:

The Prior Art does not teach or suggest the illuminated pushbutton switch for soldering to a circuit board, which includes a housing, a pushbutton assembly that is slideable between inward and outward positions on the housing, and spring that biases the pushbutton assembly outward, wherein the pushbutton assembly includes a dielectric pushbutton frame having a contacting surface, and a plurality of pushbutton conductors fixed to the frame and having portions lying on the contacting surface, the pushbutton assembly includes a dielectric pushbutton depressing element having a through passage that surrounds the bulb, the depressing element having an inner end mounted on the pushbutton frame and having an outer end projecting outward of the bulb. The pushbutton frame having an outward frame extension, a pair of the pushbutton conductors having middle portion extending through the frame extension, the pair of pushbutton conductors having outward ends that form a pair of crimp portions lying outward of the frame extension. A method for constructing an illuminated pushbutton switch for soldering to a circuit board including the steps of sliding a dielectric pushbutton element that has a through passage around the light so the bulb is received in the passage, and latching an inner end of the pushbutton element to the pushbutton frame, with an outer end of the pushbutton element extending outward of an outer end of the bulb.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
